Parts List		
2	Main Jets	DJ106
2	Main Jets	DJ108
2	Main Jets	DJ110
2	Main Jets	DJ112
2	Main Jets	DJ114
2	Fuel Needles	DNO119
2	Slide Springs	DSP005
4	Adjusting Washers	DW0001
2	E-Clips	DE0001
1	Plug Drill	DD 5/32
1	Screw	DS0001

## STAGE ONE INSTRUCTIONS

1. Remove the vacuum slide from the carbs. Remove the stock needles & spacers, noting the order of assembly.
2. Install the Dynojet needles on groove # 2, using all stock spacers (Fig. A). Install the adjusting washers above the e-clip (2 per needle). Install the Dynojet slide springs (DSP005) in place of the stock slide springs.
3. Remove the main jet and replace with the Dynojet main jets provided. Use the DJ108 main jets with stock exhaust. Use the DJ112 main jets with aftermarket headers or slip-ons with free flowing baffles. Be sure that the jets you are changing are the main jets.
4. Locate the fuel mixture screw (Fig. B). If you see a screw head, proceed to adjusting procedure. With the plug drill (DD #5/32) provided, carefully drill thru the plugs. NOTE: The mixture screw is directly underneath this plug, be ready to pull back on the drill the instant you break thru. Use screw provided to secure and remove the plug. Carefully turn mixture screw clockwise until seated, then back out 3 turns.
